---

Result-oriented Technical Consultant and Full-Stack Developer passionate about solving complex technical challenges. Proven track record in designing, developing, and implementing scalable solutions. Proficient in Javascript, Python, and SQL, with strong experience in AWS and cloud technologies.

## EDUCATION

---

**Stetson University** *B.S. in Computer Science*

May 2023

**IBM** *Full Stack Developer Professional Certificate*

August 2024

**AWS** *Certified Cloud Practitioner*

September 2024

## EXPERIENCE

---

### AssistRx

Orlando, Florida

*Technical Consultant*

September 2023 – Present

- Scheduled and led meetings with providers and offices to showcase our iAssist SaaS solutions and it's value, answering questions and fostering a relationship to ensure client satisfaction and engagement.
- Improved existing, and identifying new, internal documentation, processes, and policies within the iAssist software, leveraging my expertise in full-stack development to understand and communicate the internal infrastructure of our SaaS.
- Built rapport with multiple Program and Customer Success managers and effectively assisted them with enterprise requests to maintain a proper service level agreement (SLA).
- Collaborated with cross-functional teams to troubleshoot complex technical issues, manage development tickets, and ensure proper communication within a fast-paced healthcare platform.
- Implemented a now-integrated custom Python application for my team that streamlined the onboarding formatting process reducing its time by 60%.

### Perryman & Associates

Deland, Florida

*Software Developer*

August 2021 – May 2023

- Created a C# application that used Dapper NuGet ORM's query-first approach to write SQL queries to create users in the Database with appropriate permissions based on user input.
- Utilized C# and Telnet to extract data from multiple off-site Linux devices used as an employee time clock at different office locations and created a dashboard that visually represented that data.
- Participated in high-level team meetings exposing me to real-world problems the company faced and their solutions.

## PROJECTS

---

### Solari Finance

[solari-finance.vercel.app](https://solari-finance.vercel.app) • [github.com/quinonesnn/solari-finance](https://github.com/quinonesnn/solari-finance)

- Full Stack financial SaaS platform with secure authentication, multibank connections, transaction history, in-app payment transfers, and built-in application performance monitoring and tracking all hosted on Vercel.
- Built with Next.js, React, Typescript, and Appwrite Database. Utilized Plaid, Dwolla, and Sentry API's.
- Plans to implement a drag-and-drop budgeting system with the already implemented categorization.

### Stock UP

[main.d3tcf1sixeb6j6.amplifyapp.com](https://main.d3tcf1sixeb6j6.amplifyapp.com) • [github.com/quinonesnn/inventory-management](https://github.com/quinonesnn/inventory-management)

- Full Stack Stack Inventory Management Dashboard Application with various filterable visualization tools, real-time inventory levels, stock movement tracking, and performance metrics all hosted on AWS Amplify.
- The front end is built with Next.js, React, Typescript, and Redux. Node.js, Prisma to Postgres database power the backend, integrating AWS RDS for DB management, EC2 for computing power API gateway, and S3 for storage solutions
